Love and Care

As we find ourselves having to care for several generations of family members, the challenge can seem overwhelming. Building is an important decision, but building for a multigenerational family can be downright daunting. What should I include? How can I make sure each family member is both safe and comfortable? Fortunately, we are here to help.

In this brochure, you will find our best-selling models for multigenerational households and learn why they are constant favorites with multigenerational customers just like you.

Our customers also share some tips for successfully building a multigenerational home. See what they like about their new home and the ideas they recommend to make the process an easy and rewarding one.

Like a true friend, HFH is always there to support you and help you build the perfect home for your multigenerational family.

Good thing we planned ahead”

Omar B.

When unexpected situations arise, it's a good thing to be prepared. The Cary is the perfect home plan for multigenerational needs. The beautiful downstairs layout is complemented by an optional second floor. Our customers love the flexibility of adding a complete master suite and living quarters upstairs.

Another appreciated feature is the downstairs master suite being on one side of the house while the other bedrooms are on the other, perfect for privacy. With its warm open-living areas and practical utility room, the Cary is a recurring favorite with multi-generational families.

The optional 2nd floor can be left unfinished at the time of construction, ready to be transformed how and when you need it, so you too can say “good thing we planned ahead”.

”
3 generations cohabit easily

Rob Secoy

With its comfortable footprint, the Pine Prairie makes multigenerational living simple. Our customers' favorite features are the large utility room opening to a double pantry, the large open-living areas, and the beautiful rear and front porches, perfect to entertain family and friends, or to simply enjoy a coffee while admiring nature.

Upstairs, the large bonus area can easily be transformed into another master-suite while the additional bedrooms ensure everyone is comfortable. In your beautiful home, you will be delighted to keep family traditions alive and enjoy each member's company.

Don't forget to dedicate a space for children to play.

| *Anderson Family*

The large open floor-plan makes moving about easier for someone with mobility issues. Plus I can keep an eye on everyone while I prepare dinner.

| *Maria T.*

My large pantry and utility room keep me sane. I can control the mess that gets in the house, deal with all the laundry, and I have space to store everything!
